COMMERCIAL RECYCLING REPORT

WHY RECYCLE?

- ❖ TO SAVE ENERGY
- ❖ TO REDUCE WASTE
- ❖ TO CONSERVE RESOURCES

Every ton of paper recycled conserves 17 trees, 7000 gallons of water, and enough electricity to heat the average home for 6 months.

Recycling one ton of cardboard saves over 9 cubic yards of landfill space

If these materials are recycled they save ENERGY and LANDFILL space – which also saves MONEY

The City of Washington Ordinance No. 1555 requires businesses to recycle the following materials:

Aluminum Containers, Office Paper, Corrugated Cardboard
Leaf Waste

Please return the bottom portion to: City of Washington, 55 West Maiden Street, Washington, PA 15301
